Mineral Resources & Lease Opportunities of the Calista Corporation Region, Southwest Tintina Gold Province, Southwest Alaska

- Calista Corporation is one of 12 Alaska Native Regional Corporations created under the Alaska Native Claims Settlement Act of 1971 (ANCSA) in settlement of aboriginal land claims.
- The Calista Region is home to 56 villages spread along the Bering Sea coast & two of AK's mightiest rivers-the Yukon & Kuskokwim.
- The People of the Calista Region include the Yup'ik, Cup'ik, and Athabascan cultures.
- In 1972 Calista was incorporated in Alaska & granted 6.5M acres, making it 2nd largest corp. by land established under ANCSA.
- 264,000 acres of this entitlement is fee estate where Calista owns both surface and subsurface rights.
- Most of this fee estate is prospective for metallic resources.

Why Work with an Alaska Native Corporation?

- Alaska Native Corporations (ANC) own the land and mineral rights for fee estate lands (surface/subsurface), not the State or Federal Government.
- Working directly with the property owner aligns interests of both parties and streamlines the discovery to potential production process while ensuring engagement, and social and environmental stewardship.
- Several success stories of ANC partnerships with industry have resulted in significant mineral projects or mines:

1) Donlin Gold Project-Calista/TKC (The Kuskokwim Corp.)/Donlin Gold LLC (Barrick Gold Corp. & NovaGold Resources Inc.)

- 2) Red Dog Mine- NANA/Teck Resources
- 3) Manh Choh Gold Project (formerly Peak)- Tetlin Village Council/Kinross Gold Corp

4) Upper Kobuk Mineral Project-NANA/Trilogy Metals

5) Goodpaster Mining District: Carrie Creek, Tibbs, Mt. Harper- Doyon/Tectonic Metals

Why Work with Calista Corp?

- Opportunity to find the next Donlin (39 Moz Au @ 2.24 g/t M&I, to 49Moz Au including inferred @ 2.02 g/t Au).
- Calista is committed to providing economic and social benefits to shareholders in the region while exemplifying corporate responsibility, cultural stewardship, and economic stability.
- Calista is the second largest ANSCA private landholder in Alaska.
- 264,000 acres of Calista's fee estate entitlement is prospective for minerals; much is underexplored.
- 25-year history of mineral exploration and mining experience through agreements & partnerships with both junior & senior companies, including Donlin (with Barrick & NovaGold), junior explorers, & placer miners.

Contact Calista's Sr. Geologist Varina Zinno @ <u>vzinno@calistacorp.com</u> to learn more about lease opportunities and available projects. <u>https://www.calistacorp.com/lands/maps-and-reports/</u>
